RECOMMENDATION FOR: Deputy Director (Support)

SUBJECT: Request for Increase in Office of Training Personnel Ceiling.

1. This memorandum contains recommendations submitted for DDCI approval. Such recommendations are contained in paragraph 6.

2. Activation of Agency-wide foreign language incentive and development programs, approved in principle by the Career Council and to be prescribed in Regulations No. [REDACTED] (now in process of coordination), will place a very sizable additional burden on the Office of Training in the testing and recording of employee proficiency. In addition, the actual language instruction will create a need for more on-board instructors or for contractual arrangements for this training.

25X1A

3. OPA memorandum of 7 June 1956 (See Tab A), requests eight (8) additional slots and ceiling authorizations to meet the demands of the programs. Three of the positions (Par. 3a, b and c of OPA memo) are necessary for the language proficiency testing activities incident to the program. One position, a laboratory technician (Par. 4 of OPA memo) is requested to operate and maintain the equipment in a second laboratory operated by the Language and External Training School. This staff concurs in the need for these four positions, assuming that the necessary regulations will be published to initiate the program.

4. This Staff is currently studying the language and area training situation to determine the efficiency, security and economy of Agency conducted courses versus contract training. Therefore, this Staff suggests, with the concurrence of OPA, that the request for two scientific linguist positions and two clerical supporting positions (Par. 3a and b and Par. 5 of OPA memo) be suspended pending the outcome of the study mentioned above.

5. Comments of the Office of Personnel and the Comptroller are attached (See tabs I and II).

6. It is recommended that, subject to publication of Regulations No. [REDACTED]
